

歌詞に登場する「夜」の文字数
CHARTS ON "Night"

TOTAL NUMBER OF "夜(Night)" SUNG PER PIECE

Small boats from five North Carolina mother ships have laid two purse nets and drawn them about portions of a big school of menhaden. Taking aboard sections of the fish they constrict the fish into a smaller area. Once the fish are massed, a mother ship will load the harvest. "Fatback" along the Carolinas' coast means menhaden, a fish yielding oil used in soap.

Although present policies have checked the decline, new forms of propagation must be adopted if the species is to be saved.

The late Dr. Francis H. Herreshoff, foremost student of the lobster problem, proposed the abolition of the close season which he considered a futile practice. He suggested adoption of a double gauge to permit the escape of all lobsters under 9 inches and to make the entrance of lobsters over 11 inches impossible. He also would have forbidden the capture of all outside those limits and would have protected the "berried" lobsters, fixing a bounty for each one delivered to authorities. The proposed rearing young lobsters to the bottom-seeking stage in hatcheries, liberating them only when the perils of infancy are past.

Maine, which produces the bulk of the United States' catch of American lobsters, has adopted the double gauge for traps, protect-

and extremely rapidly after death. It is soon absorbed by the bones and lime content to be absorbed by the water. Hence the multitudes die without leaving any trace behind.

Once in a great while a few teeth, or a fin spine, or a bone buried in clay may endure, but the exceptions are notably rare.

It is because of this condition that few traces of the earliest fishes of the geologic past have been left. An expedition from the Smithsonian Institution some years ago unearthed near Canon City, Colorado, what are believed to be the oldest fish remains known
